

# Ordering and comparing lengths

Find 5 objects to trace on this sheet.

Measure their length to the nearest centimetre.

Cut them out and order them from shortest to tallest.

You could use different leaves from your garden or toys, but don't forget to write **cm**.

- For an extra challenge, try measuring everyone in your house, including your favourite teddies. Can you order them from shortest to tallest? How many of them are over 1 metre tall?

## Drawing and measuring honeybees

Measure these honeybees to the nearest cm.

Can you draw me a honeybee that is 6cm long?

Can you draw me a honeybee that is 10cm long?
