

Teen numbers are a bit tricky to subtract. Can you choose a known fact to help you answer these subtraction sums? Just like in the Final Quiz, draw lines to the number bond in the green box that you think would help you to solve these tricky equations.

1. Which number bond would help solve this equation? Why?

$18 - 4 = \square$

$18 - 3 = \square$

$18 - 2 = \square$

Which number bond would help you solve each equation?

$8 - 2$

$8 - 4$

$8 - 3$

2. Which number bond would help solve this equation? Why?

$16 - 5 = \square$

$16 - 3 = \square$

$16 - 4 = \square$

Which number bond would help you solve each equation?

$6 - 3$

$6 - 4$

$6 - 5$
